

Tropical Depression 06W JIC Release - Separate from COVID-19 JIC Releases.

This will be the final JIC release relative to Tropical Depression 06W, unless warranted.

The JIC will continue to issue information regarding COVID-19.

Joint Information Center - JIC Release No. 5

June 22, 2021, 10:10 a.m. (ChST)

**Guam to Move to COR 4 by 11 a.m.;
June 22 COVID-19 Vaccination Clinics & Testing Canceled**

Governor Lou Leon Guerrero will place Guam in Condition of Readiness (COR) 4 at 11 a.m., following the cancellation of the Tropical Storm Warning for Guam by the National Weather Service (NWS) Weather Forecast Office Guam.

Tropical storm force winds are no longer expected for Guam. Tropical Depression 06W made its closest point of approach (CPA) to Guam and is now moving away into the open Philippine Sea. Winds are expected to decrease slowly during the afternoon as 06W moves off to the northwest and should be 15 to 20 mph by evening. Heavy showers could still bring an additional 1-3 inches of rain through this evening. Be alert for any flooding in your area. The community is reminded to practice caution on the roadways as rainy weather is still expected throughout the day.

Advisories in Effect

A flash flood watch remains in effect for Guam, Rota, Tinian, and Saipan through Tuesday evening. Torrential rains could lead to flash flooding in low-lying and poor-drainage areas. Rainfall of 3 to 5 inches with locally heavier amounts are possible through Tuesday evening.

A high surf advisory remains in effect for Guam, Rota, Tinian, and Saipan until 10 a.m. Wednesday morning. Hazardous surf of 9 to 12 feet is expected for east and south facing reefs of the Marianas, producing dangerous swimming and surfing conditions and localized beach erosion.
